Summit, 2009 and Chairman, WBSEDCL

### Confirmed Speakers for IES 09

- Mr Partha S Bhattacharyya, Chairman, Coal India Limited
- Mr R S Sharma, Chairman and Managing Director, ONGC

### Background

Indian power sector has been quite vibrant over last few years and has set a very ambitious target of achieving 78,000 MW of capacity addition by 2011, exclusive of captive power generation. With global economic turmoil wherein economies across the world are getting affected, the major power consuming sectors such as manufacturing, steel, cement etc cannot afford to remain unaffected.

So what would happen next? One of the most important determinants is the pace of global economic growth. But, this time, the question is how deep and long would the recession be and how big would be the hit on both power and power consuming sectors. We strongly feel that this is the appropriate time to discuss strategies and make corrections/amendments to the deviations, if any, in achievement of targeted plan.

Against this backdrop Indian Chamber of Commerce in association with Ministry of Power and Ministry of New and Renewable Energy, Government of India is organizing the 3<sup>rd</sup> India Energy Summit at Hotel Hyatt Regency, New Delhi during 30 and 31 October 2009.

### Objective

The Summit would try to assess the progress made by Indian power sector and would try to identify the bottlenecks for planned and ongoing projects in the sector. The summit would also try to suggest a pro industry oriented strategy and actionable agenda to meet the energy requirement of the country.

### Summit Focus

**Taking Stock** Planned Capacity vs Actual Installed Capacity, Infrastructure and Investments

**Demand vs Supply** A re-look at current strategies/11<sup>th</sup> Five Year Plan

**India Energy Challenges** Navigating an Era of Volatile Oil Prices and a Turbulent Financial Environment

**Capital Raising** A Challenge in the period of tight liquidity scenario

**Assessing the Economic and Social Viability** of Nuclear Power Developments

**Optimizing Power Plants** that Best Reduce Feedstock Cost  
**Enhancing Efficiency** in power generation and transmission and distribution

**Changing Energy Mix** Increasing Role of Renewable Energy to Conventional Energy

**Cross Border Investment** Outlook and Strategies  
**Tariffs, Taxes, Pricing, Subsidization & Role** of Regulator  
**Environment and Carbon Emissions** Protection and Control  
**Technology and Research & Development** initiatives in the sector to enhance the efficiency
